PROFILE

Software Developer with a unique focus on bridging the gap between high-level web applications and low-level systems engineering. Experienced in building scalable SaaS infrastructure, custom business management systems, and language runtimes from the ground up.

EXPERIENCE

Freelance Software Developer

2024-present

- Developed and deployed **CRM/CMS** and business management software **for automotive companies**.
- Built full-stack web applications for customer management, workflow automation, and daily operations.
- Handled complete development lifecycle including requirement analysis, UI/UX design, backend development, and deployment.

PROJECTS

NanoJS – Custom JavaScript Interpreter | C++, Systems Programming

- Architected a functional JS interpreter** from scratch using **C++**, implementing a custom recursive descent parser and an Abstract Syntax Tree (AST) execution engine.
- Engineered a runtime environment capable of handling dynamic data types and asynchronous execution patterns.
- Optimized the evaluator for lightweight performance, enabling execution of complex logic outside of standard browser environments.
- Production Validation:** Successfully deployed a [personal portfolio](#) powered by the **NanoJS engine**

OrbitForm – Serverless Form Backend (SaaS) | Node.js, AWS SES, React (160+ users)

- Built a **serverless form submission platform** enabling developers to receive form responses without managing backend infrastructure.
- Designed a **secure REST API** for handling form submissions and integrated **AWS SES** for reliable email notifications and delivery.
- Implemented spam protection, validation, and scalable processing to support production-ready website forms.

Mathematics Mock Test Engine | React Native ,Python

- Launched an interactive web platform for timed competitive exam preparation, achieving **1,000+ user downloads/visits**.
- Implemented a state-managed scoring system and progress tracking to provide students with instant performance analytics.
- Designed a distraction-free UI/UX specifically optimized for low-latency performance on mobile devices.

SKILLS

Technical: SQL, Python, Statistics, ETL, Data Visualization, AI Automation, Machine Learning, NLP

Languages: C++, JavaScript, Python

Frontend: React, Next.js, HTML, CSS, Tailwind ,UI/UX Design

Backend: Node.js, REST APIs, Backend Development

Cloud & Databases: AWS SES, PostgreSQL

EDUCATION

St. Xavier's College of Management & Technology
Bachelor of Computer Application

Patna, India
2021 – 2024

ACHIEVEMENTS

College Excellence Award: Recognized by St. Xavier's College for developing software that automated student result generation via web scraping and data processing.

Open Source Contributor: Actively building and maintaining **NanoJS**, a systems-level project focused on language runtime mechanics.
